LIST 2605

ROSES

1926-1927

BUDDED ROSES ONLY

FACILITIES. Our connections are unexcelled. We market the entire output of three important growers of budded roses.

NOVELTIES. This list embraces the most up-to-date offerings in the country. We are now able to supply budded stock of many European Novelties simultaneously with their introduction abroad.

ABBREVIATIONS. The classes, H. T., H. P., etc., are too well known to need explanation. N. R. S. means National Rose Society of England. A. R. A. followed by figures refers to volume and page of American Rose Annual for further details. This is issued by American Rose Society to which everyone interested in roses should belong.

QUALITY. Everything offered is field grown and California grown. Eastern Nurserymen who have visited California know that our Hybrid Teas and Pernetianas are absolutely unequaled. Th vigor is such that budded stock is full grown at this date.

TIME OF SHIPMENT. Our budded roses are all grown in Northern California. Growth is completed by June. They are ripened slowly during summer and can be dug and shipped beginning about November 1st.

QUANTITIES. All prices are "flat" regardless of quantity. Novelties listed at \$1.00 or higher may be ordered singly if desired. Varieties at 75c or less, not less than 10 of a kind.

PACKING. Charged for at cost of material.

TERMS. To buyers of known or established credit, 60 days net from date of shipment. Otherwise cash with order or 25% with order, balance C. O. D.

SHIPMENT. State explicitly whether you wish freight or express. In either case all shipments are carried at buyers risk. Delay or damage in transit is up to transportation companies. Express is recommended for all Eastern shipments.

WHOLESALE ONLY. This list is for those who are legitimately in the trade and for no one else. Orders from anyone not in the trade will positively not be accepted.

GRADES. Prices specified are for No. 1 grade, two years old, field grown budded plants. Second grade is not usually sold in advance but can be booked if desired at about one-third less on varieties listed at 75c or lower.

ROOTS. The great majority are budded on Manetti. Other stocks used are La Griferaie, Ragged Robin and Odorata.

OWN ROOT ROSES. Ordinarily we offer a complete line of own root roses as well as budded, but, on account of floods last winter we have so little this year that we are omitting them entirely.

CLIMBERS are grouped by themselves as a matter of convenience.

1926 NOVELTIES

The National Rose Society of England gave only two Gold Medals this year, to Dame Edith Helen and Lady Margaret Stewart; both are offered below:

DAME EDITH HELEN—H. T. (Alex. Dickson & Sons 1926). We quote introducer's description verbatim:

"The colour is pure glowing pink, a self colour throughout, from the bud opens till the petals fall, the shade changes hardly at all. The bloom which is carried on a rigid erect stem, is very large and full, of perfect spiral form, and opens well in all weathers. It possesses the true old rose scent in the very highest degree. The foliage which is abundant is bright bronze in the young stage, changing with age to natural green, and is both mildew and black spot resistant. The growth is thoroughly hardy, very vigorous, of upright free branching habit, producing blooms freely. As a garden, bedding, or exhibition rose, this magnificent and distinct variety will have few equals, and we recommend it with the utmost confidence." A. R. A. 11-178, 181. Gold Medal N. R. S.

DORIS DICKSON—Pern. (Sandy Dickson 1926)

Coloring wonderful but hard to describe. Ground color is orange cream heavily veined and pencilled with brilliant cherry red. Vigorous and hardy. Flowers of medium size,

extremely fragrant, exquisitely formed and borne profusely on good stems. A. R. A. 10-179. Cert. of Merit N. R. S.

FRANCIE SIMMS—H. T. (Alex. Dickson & Sons 1926)

Rose red crayoned with bright carmine; base of petals buttercup yellow. Flowers globular, large and full on erect stems. Highly fragrant. Growth erect with heavy dark green foliage.

LADY MARGARET STEWART—H. T. (Alex. Dickson & Sons 1926). We quote introducer's description verbatim:

"A rose of most unique and distinct colour and very difficult to portray. In the young stage the flower is deep sunflower yellow heavily veined and splashed with orange scarlet. The reverse of the petals being deeply marked with carmine, as the bloom develops these shades intermingle, forming in the fully developed flower a beautiful cadmium orange effect. The bud is long and pointed opening to a very full flower of pleasing and decorative form. It is a variety which grows vigorously, being perfectly hardy and of excellent upright bushy habit. The foliage in itself is a thing of beauty the long rigid stems being clothed with serrated leathery leaves of glowing sage green, absolutely free from mildew and blackspot. The merits of this excellent variety are further enchanted by its delightfully sweet perfume, reminiscent of Marechal Niel. A. R. A. 11-179. Gold Medal N. R. S.
